

TAYLOR NICOLE SNYDER

CORR SEASON OPENER / TROPHY KARTS

April 21-22 2007
Antelope Valley Fairgrounds, CA

Nearly 60 Trophy Karts showed up ready to race at the 2007 Championship Off Road season opener on a brand new course loaded with bumps and jumps. Although the approx 9,000 spectators in attendance came to watch today's superstars in the full size Pro 2 and Pro 4 class's, they ended up cheering on tomorrow's hero's in some great fender banging Trophy Kart short course racing.

ProComp Motorsports own Taylor Nicole Snyder showed up in her freshly painted #27 Trophy Kart and was ready to trade some of her new paint for track positions. With some tough elimination rounds leading up to Sundays main event, Taylor battled with everything from having to come from the rear after a near roll over in a first turn maylay, to dealing with fuel, electrical and drive train issues. After working all the bugs out of the new #27, Taylor was still able to qualify for a mid pack starting position in Sundays 18 car main event.

Serious racing & carnage was had right off the start of the main event with Trophy Karts racing three wide through 2' foot bumps leading into the first turn. Taylor in the #27 ProComp Motorsports entry maintained her position until the dust settled and then went to work moving her car up through the pack of leaders. By the checkered flag of the season opener, Taylor had worked her way into a top 5 finish with the help of some great people and some wild driving!

A word of thanks goes out to AG Sand Cars, OMF, En Fuego, Mastercraft , 7 For All Mankind Jeans, Coyne Motorsports and the great guys at Doug Flemming Racing who kept the car moving up through the pack. **Next stop, Pomona California May 19-20**
